

Week 13: Coding Assignment

URL to GitHub Repository: https://github.com/aziyelm/Week_13_Coding_Assignment

URL to Your Coding Assignment Video: https://youtu.be/glw_iTxElZc

Instructions:

- In Visual Studio Code, write the code that accomplishes the objectives listed below and ensures that the code compiles and runs as directed.
- Create a new repository on GitHub for this week's assignments and push this document, with your project code, to the repository.
- Include the URLs for this week's repository and video where instructed.
- Submit this document as a .PDF file in the LMS.

Coding Steps:

- Using **create-react-app**, create a new React project. Create a LoginForm component that contains the following:
 - Username and password input fields, an h3 that says Log In, with a border. Style the component using the default generated CSS file.
- Create a Navigation component that contains links styled like a navbar.
 - The links don't have to go anywhere.
- Put the Navigation component at the top of the page and the LoginForm in the center of the page.

Week 13: Coding Assignment

Video Steps:

- Create a video, up to five minutes max, showing and explaining how your project works with an emphasis on the portions you contributed.
- This video should be done using screen share and voice over.
- This can easily be done using Zoom, although you don't have to use Zoom, it's just what we recommend.
 - You can create a new meeting, start screen sharing, and start recording.
 - This will create a video recording on your computer.
- This should then be uploaded to a publicly accessible site, such as YouTube.
 - Ensure the link you share is **PUBLIC** or **UNLISTED**!
 - If it is not accessible by your grader, your project will be graded based on what they can access.
